

PMI-CPMAI™

PMI Certified Professional in Managing AI (PMI-CPMAI)™

Lead AI Projects. Advance Your Career.

70%

While 50% of project professionals now use AI in their projects, few know how to actually manage AI as a project itself. Organizations desperately need leaders who can deliver AI success, and they're willing to pay premium salaries for this expertise.

of AI projects fail to deliver expected value

Why pursue PMI-CPMAI™ certification?

Stand out in a crowded job market. PMI-CPMAI™ is the only certification that proves you can lead and manage AI projects, not just use AI tools. In just 21 hours of self-paced learning, you'll master a structured methodology that transforms you from someone who's curious about AI to someone who can confidently deliver AI initiatives.

Your career breakthrough: Command 15-30% salary premiums. Access roles like AI Program Manager, ML Operations Lead, and AI Governance Director. Speak the language of both data scientists and executives. Lead the projects everyone else fears.

What you'll master:

- Leading AI projects without coding
- The CPMAI methodology framework
- Managing data pipelines and ML models
- AI ethics and governance
- Translating technical complexity to business value

Your investment in tomorrow starts today.

- 21-hour PMI-CPMAI™ Exam Prep Course
- Practice exam to ensure you're ready
- Leading and Managing AI Projects Digital Guide
- 3 attempts to pass within 12 months
